- **Technical & Drafting:** Floor plans, Elevation drawings, Material and furniture selection, Digital illustration
- **Software:** AutoCAD, SketchUp, Adobe Photoshop, Adobe Illustrator, Microsoft Office
- **Professional & Academic Skills:** Visual presentation, Creative problem solving, Time management, Design research

EXPERIENCE

Freelance Designer & Digital Artist

November 2025 - Present

Self-Employed (Fiverr Platform)

Remote

- Created custom digital artwork, room concepts, and mood boards tailored to client preferences and project goals.
- Worked directly with clients to manage design requirements, revisions, and timelines across multiple projects.

Wedding Design Assistant

August 2025

Independent Project

Dallas, Texas

- Assisted with the design and décor of a private wedding event, collaborating closely with the wedding party to understand their vision and translate ideas into a cohesive visual concept and finished space.
- Created detailed mood boards and color palettes to guide design decisions and ensure a cohesive and harmonious aesthetic throughout the space.
- Researched and helped source decorative elements, furnishings, and accessories aligned with the design concept & theme.
- Assisted with on-site setup and styling to ensure design was installed accurately and consistently with the approved concept.

Retail Associate

June 2024 - June 2025

Build-A-Bear Workshop

Dallas, Texas

- Guided customers through personalized design choices involving color, materials, and accessories.
- Maintained visually organized displays and workspaces to support an engaging customer experience.
- Applied precision and attention to detail during product assembly and presentation.

PROJECTS

3D Art & Form Exploration – VASE Project

December 2025

Individual Project

- Designed and constructed three-dimensional models exploring form, proportion, scale, and spatial hierarchy
- Utilized mixed materials including styrofoam, papier-mâché, and layered paper to study material behavior and surface texture.
- Applied measurement and scaling techniques to translate conceptual sketches into accurate physical forms.
- Explored structural stability, balance, and craftsmanship through iterative construction and refinement.
- Integrated dimensional lettering and vessel design to create depth, visual interest, and cohesive composition.

Residential Room Layout Redesign

November 2025

Individual Project

- Developed a functional room layout emphasizing circulation, furniture scale, and spatial balance.
- Evaluated multiple layout configurations to improve comfort, usability, and storage efficiency.
- Created mood boards and color palettes to support design intent and visual cohesion.
- Incorporated lighting and decorative elements to support both functional and aesthetic goals.
- Applied measurement and proportion principles to ensure accurate furniture placement.
- Project developed through a self-directed digital layout exercise to explore spatial planning concepts.

CERTIFICATES

- LEED Green Associate (In Progress)
- AutoCAD Professional (In Progress)
